> 3 years professional experience

React

Typescript

Node

SCSS / CSS

MongoDB

Postgres

### WHAT I'M GOOD AT

> 1 year professional experience

React Native

Golang

Swift

Vue

Laravel

### WHAT I LIKE

Personal time

Rust

Lua

Gleam

### EXPERIENCE

#### PlayUp / Co-Founder & Lead Full Stack Developer

2021 - Present

- Spearheaded the development of an ambitious platform as the sole developer, demonstrating autonomy and expertise in building the entire system from scratch, ensuring seamless functionality and scalability.
- Implemented rigorous code quality measures such as linting, formatting and thorough tests, guaranteeing the reliability and robustness of the platform while maintaining high development standards.
- Facilitated the transition of both back and front end frameworks, optimizing performance and enhancing user experience, while also introducing a React Native app to broaden platform accessibility across mobile devices.
- Orchestrated the migration to a monorepo architecture, consolidating codebase management and streamlining development processes for increased efficiency and collaboration among team members.
- Played a pivotal role in business-related activities, leveraging technical expertise to contribute to strategic decision-making and ensuring alignment between technical development and overarching business objectives.

#### Chaeban / Full Stack Developer

2020 - 2021

- Optimized and enhanced the customer-facing e-commerce website, implementing new features and improving user experience for better conversion rates.
- Integrated backend Node.js systems with the company's accounting, logistics, and delivery services, creating a centralized source of truth and streamlining operations saving staff hours of work.

#### Trademark Technology / Full Stack Developer

2012 - 2020

- Worked on over 30 projects for clients ranging from small businesses to large corporations.
- Demonstrated the ability to adapt to changing technologies and frameworks, transitioning from Laravel to Node, and later incorporating modern front-end frameworks like Vue and React.
- Expanded skill set to include native iOS mobile app development, delivering custom solutions for select clients, further broadening the agency's service offerings and contributing to overall project success.
